

## Joining SilverCraft West Club

The Basic Silver Class provides fundamental training and proper use of club facilities, materials and equipment used to craft silver jewelry and art. Our experienced members teach new members proven techniques that ensure the safety of all members. Basic Silver Class is required to become a new SilverCraft West member unless prior experience is provided and approved by an authorized Board Member.

We work with acetylene torches, so if you are on oxygen, you will not be able to join the club. Please click on this link [Silvercraft West Soldering copper](#) to watch a video of what you can expect to be doing in the Beginning Silver Class. We do not use soldering irons. Also, good vision is a must as you will be doing intricate work.

### Membership Includes:

- Basic Silver Class kit containing tools and materials needed for this class. These are yours to keep.
- Instruction manual plus additional educational materials.
- SilverCraft West membership for the remainder of the year.
